

## **PC021903-1CM - AT&T PROPOSED CHANGES**

(Excerpted from Section 8.0 of the Qwest Wholesale Change Management Process Document.)

### **8.0 CHANGE TO AN EXISTING OSS INTERFACE**

#### **Application-to-Application OSS Interface**

Qwest will support the previous Major Release of Interconnect Mediated Access (IMA) EDI for one hundred eighty (180) calendar days after the subsequent Major Release of IMA EDI has been implemented. In the event that IMA EDI major releases are implemented more than six (6) months apart, any CLEC desiring to delay retirement of the previous release should submit a CR requesting the delay. Qwest will review and grant the retirement delay up until sixty days after the Release Production Date of ~~the required test window for~~ the next Major Release. Past Releases of IMA EDI will only be modified as a result of production support changes. When such production support changes are made, Qwest will also modify the related documentation. All other changes become candidates for future IMA EDI Releases.
