

## **Summary and Notes**

In order to fulfill CR #PC070103-1, Qwest will provide 2 files for MCI (or other CLECs as they request the files) on the CLEC specific web location (same location where they access their 271 reports currently)

Each month, the following 2 files will be available on the web:

1. Design Products File - will contain the working circuits for design type products (Resale DS1 is an example)
2. Non-Design Products File - will contain the working telephone numbers for non-design type products (UNE\_P\_POTS is an example)

All products will be provided in these 2 files. These files will be comma delimited files.

The following pages indicate the variables available in each file and a short description of each variable.

## Design Products

<u>Variable Name</u>	<u>Variable Description</u>
CLEC_ID	3 digit CLEC Identification
ACNA	Access Customer Name Abbreviation
BTN	Billing Telephone Number
CKTID	Working Circuit Identification
PROD_CD	Product Code
EXT_DT	Extract Date
STATE	State

## Non-Design Products

<u>Variable Name</u>	<u>Variable Description</u>
CLEC_ID	3 digit CLEC Identification
WTN	Working Telephone Number
PROD_CD	Product Code
EXT_DT	Extract Date
STATE	State
