Description Of Change

AT&T believes that in Section 8.0, under the heading, "Application to Application OSS Interface", the language should read as follows: In the event that IMA EDI major releases are implemented more than six months apart, any CLEC desiring to delay retirement of the previous release should submit a CR requesting the delay. Qwest will review and grant the retirement delay up until the required test window for the next Major Release. The second sentence should be changed to read as follows: Qwest will review and grant the retirement delay up until sixty days after the Release Production Date for the next Major Release.
