

Overview:

The following two examples highlight the two major changes to Q.pricer quoting with the 08/05/2005 Q.pricer release. Please refer to the Q.pricer User Guide for detailed user instructions.

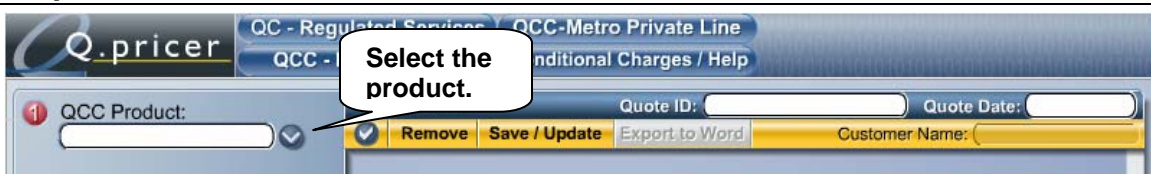

Q.pricer Support:

Please contact wholesale.qpricer@qwest.com for Q.pricer questions and to report issues.

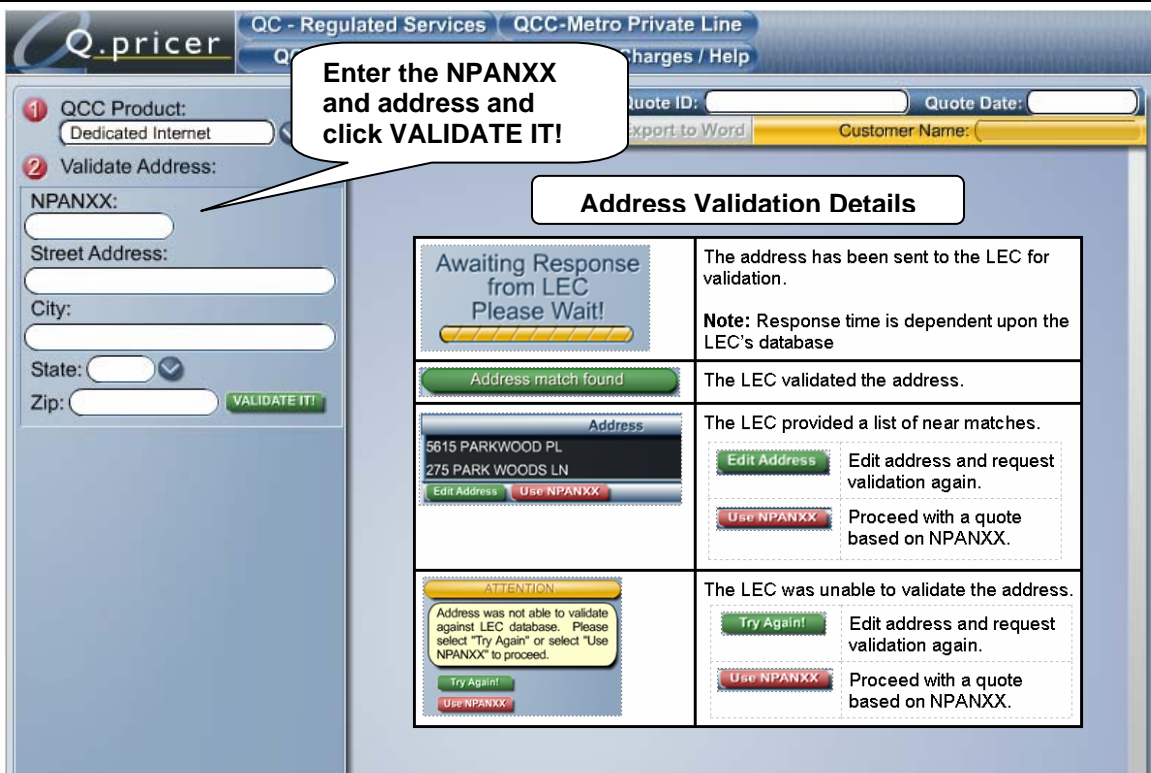

Example 1: Quoting using an Address

The following example uses Qwest Provided Access to demonstrate quoting with an address. Customer Provided Access will also use address validation.

Step 1

Step 2

Step 3

Example 2: Tracking ID

Each loop on a Qwest Provided Access quote will have a unique Loop Tracking ID. Customer Provided Access quotes will have a CPA Tracking ID. The respective Tracking ID will be requested on the order form when a service order is placed.

Qwest Provided Access

Saving a quote will generate the Loop Tracking ID. Once a quote is saved, any change to the quote requires the quote to be saved again in order to generate a new Tracking ID.

Tracking ID Locations

Customer Provided Access

Each time a route is selected, a CPA Tracking ID will be generated.
